CAM 4 TECHNOLOGIES COMPANY PROFILE

CAM4 Technologies has been in operation for 6 years, and has built sound business relationships with various companies all over KZN and the Eastern Cape. (ABI, SPAR, Build-it, Volvo SA, Supa Quick, Blick SA, Platinum Group, Heinz Toyota and many more).

Since inception we have grown from a small business into a dynamic company consisting of numerous installation teams, a maintenance team on call 24 hours, sales representatives, and a specialised financial facilitator, experienced in asset based finance. Finance can be arranged through various financial institutions which enables our clients the option to install the latest technology without any initial capital outlay.

Our systems are designed to suit each individual clients needs after doing an on – site assessment. Only good quality equipment (i.e. Sony, Chateau, GKB and Samsung) is sourced from reputable suppliers with proven track records. Our software is adaptable in that it can be formulated to suit the various needs of our clients (i.e. Networking, remote viewing, video text overlay for tills, masking, watermark feature, motion sensors, etc)

All our quotes, financed over a 36, 48 or 60 month period, include free software upgrades when they become available and a free maintenance contract. Furthermore our technical team calls on our clients periodically to check and clean the cameras, if required, and should they find any problems attend to them free of charge. The only obligation required by our clients is to keep the system insured for everyday perils i.e. theft, fire, vandalism, lightening, etc. However, should they experience any problems with your system we are only a phone call away and will attend to it timeously limiting the downtime to a few hours.

We also pride ourselves on our after sales service not only selling you our system but also keeping you as a permanent satisfied client building a long and fruitful business relationship.

Should you require any further information, please do not hesitate to contact me.

Kind regards,

Patrick Sorour
